OBJECTIVE

Computer Science undergraduate with hands-on experience designing scalable, fault-tolerant distributed systems and backend microservices, backed by a strong foundation in data structures, algorithms, and complexity analysis (1027+ problems solved, GATE CS qualified). Seeking an SDE Intern role to design and build innovative, large-scale distributed systems.

ACHIEVEMENTS

- **Winner — Smart India Hackathon 2025** (Software Category) — national-level competition among 100,000+ participants.
- **Shortlisted — Singapore-India Hackathon** — selected by the **Government of India** to participate in the international, government-backed hackathon.
- Solved **1027+** DSA problems across LeetCode, CodeChef, and Codeforces; achieved a **LeetCode rating of 1692** (max **1742**).
- **GATE 2026 (CS)** — Qualified; strong fundamentals in **algorithms, data structures, operating systems, and object-oriented design**.

EXPERIENCE

PGAGI — Jun 2026 – Present
SDE Intern — *Remote*

- Designed and built the backend for a **ride-hailing application** using **NestJS**, structuring modular, fault-isolated services and **REST APIs** for real-time rider/driver matching and trip management.
- Built and shipped **three production websites** using **Next.js**, delivering performant, SEO-friendly, server-rendered applications.
- Integrated **TanStack Query** for efficient client-side data fetching, caching, and state synchronization across all three applications.
- Implemented **Server-Sent Events (SSE)** to power real-time, low-latency updates and live data streaming to the client.

Shammtech IT Solution — Jul 2025 – Sep 2025
MERN Stack Developer Intern — *Jhansi, India*

- Engineered **low-latency real-time event streaming** via Socket.io; optimized message throughput to handle concurrent user interactions in production.
- Built **modular backend services** within the MERN stack; integrated RESTful APIs supporting mission-critical features in live modules.

Drag — Apr 2025 – May 2025
MERN Stack Developer — *Jhansi, India*

- Implemented **OAuth 2.0 authentication** flows ensuring industry-standard identity management and user data privacy compliance.
- Refactored **MongoDB schemas** and aggregation pipelines, achieving measurable reductions in query latency and database load.

PROJECTS

HireBridge | Express.js, TypeScript, Kafka, Redis, Gemini AI, Next.js | Code — **Jan 2026**

- Architected a **5-microservices distributed system** using Express.js/TypeScript, enabling independent scalability, fault isolation, and fault-tolerant operation across an enterprise-grade backend.
- **Apache Kafka** for async event-driven notifications; **Redis** caching reduced API response times by **70%**.
- Integrated **Gemini AI** for intelligent document parsing; multi-modal pipelines delivering actionable insights in **under 3 seconds**.
- Secured with **JWT-based stateless authentication** across hybrid REST/Kafka communication layers.

KrishiSakhi | Express.js, MongoDB, Google GenAI, ElevenLabs, Twilio | View | Code — **Dec 2025**

- **AI-powered diagnostic assistant** for rural communities using **Google GenAI**, enabling accessible, intelligent healthcare support.
- Built scalable **REST APIs** with **Express.js/MongoDB** for user profiling, history tracking, and personalized recommendations.
- Implemented **image-based disease detection** and intelligent recommendation engine with real-world diagnostic impact.
- **Multilingual voice/text interaction** via **ElevenLabs**; real-time alerts via **Twilio** for accessibility.

EDUCATION

Bundelkhand Institute of Engineering & Technology — 2023 – 2027
B.Tech (Computer Science and Engineering) — ***CGPA: 9.05*** — *Jhansi, India*

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript

Core CS: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Complexity Analysis, Distributed Systems

Backend: Node.js, Express.js, NestJS, REST APIs, Apache Kafka, Redis, Socket.io

Frontend: React.js, Redux, Next.js, TanStack Query, SSE

Databases: MongoDB, PostgreSQL

Cloud & DevOps: Docker, Git, Firebase, GCP

AI/ML: Gemini API, LLM Integration, RAG (Retrieval-Augmented Generation), LangChain, LangGraph Multimodal Pipelines
